Assembly Information

- There are no tools required for assembly.
- Pins MUST be used when lofting your bed. Extra pins are available from your Building Supervisor or House Fellow.
- Use long pins for beds and short pins for other pieces.
- The safety bar should NOT be removed. If the bar is not in the proper position for your setup, simply turn the bed over side-to-side or end-to-end to position it correctly.
- If you are lofting near a window, the safety rail must be next to the window.
- The bed frame can be flipped to give two different height options. When lofting, you can also rest the bed legs on or behind the stacking units to give two additional height options.

Important Safety Requirements

- Two or more people are required to lift and stack furniture components. Do not try to loft furniture by yourself.
- Steel pins must be inserted in the holes of a furniture piece before another piece is stacked on top of it.
- Remove the mattress before lofting a bed.
- If you have questions about your loft, please ask your House Fellow.

Proper Lifting Techniques

- Keep your back straight and bend your knees.
- Lift with your legs and arms, not with your back.

Additional Guidelines

Avoid Adhesives
Avoid using adhesive tape on your furniture since many tapes will cause a chemical reaction with the finish and leave a permanent mark.

No Storage
All furniture must remain in the room. There is no loft storage in the building and furniture cannot be removed from the building.

Disassemble Lofts
At the end of the year, the furniture must be returned to the original down position or you will incur a $50 charge per bed. Please see your Building Supervisor or House Fellow if you have any questions.

This brochure is also available on the University Housing website: www.housing.wisc.edu

Welcome to your new home in University Housing. We hope you have a great year!

This Loft Assembly Guide can be found on the University Housing website at: www.housing.wisc.edu

Option 1
Unlofted

One option is to leave the beds in the original unlofted down position as shown below. The bed frame is reversible, giving you two different height options.
Option 2
Bunk
This option bunks the beds. The other furniture pieces may be stacked 3 high to maximize space. Remember to use the long pins when stacking the beds.

Option 3
Low Trundle
The lower bed rests on the floor while the higher bed rests on the lower bed’s safety rail and the bookcase.

Option 4
High Trundle
The lower bed rests on the two bookcases while the higher bed rests on the lower bed and the desk.

Option 5
Loft
This option lofts one bed on the two desks while the other bed remains unlofted. The bed can be lowered by resting the bed legs behind the stacking unit.
