New in 2015-16: Career Kickstart in Ogg

Join fellow returners next year, and make the next step in your life with the new Career Kickstart program in Ogg. Beginning in 2015-16, Ogg will be exclusive to non-freshmen and will offer special events and resources geared towards landing an internship, finding a career path, and more!

More Info
If you come across a broken window, lock, or another urgent room situation such as a malfunctioning elevator, it is important to contact your house fellow or hall desk immediately. Non-emergency repairs such as burst light bulbs, window screens that need to be replaced, furniture that needs to be fixed (that is otherwise not causing a hazard), or problems with insects in rooms, are requested through an online system by submitting a MARS request.

To submit a MARS request, go to www.laundryalert.com or download the Laundry Alert app for your mobile device. The app can be downloaded for Android and iOS devices in the play store or iTunes App store.

Sellersy Laundry Facility: located in the A & B tower basements near elevator lobbies.

At University Housing, we make energy conservation a priority. In Sellersy Hall, hot water is pumped through fin-type baseboard convectors in each room. There is an opening at the bottom and top of the convector. The convector has a damper control knob on the front which must be in the open position (turn knob to the left) so that the air can freely pass. Always check to make sure belongings such as furniture, bedding, and carpet are not pushed up against the convector openings. A free flow of air must be maintained around the heating unit in order to heat your room.

When leaving your room for the day, please close windows in order to help conserve energy. It is important to keep your windows closed during unusually cold or warm periods to conserve energy and maintain comfort for yourself and other residents.

HELPFUL TIPS
1. Help conserve energy through some simple habits.
2. Close your drapes or blinds at night.
3. Open your drapes or blinds on sunny days during winter months.
4. Don’t leave the window open.
5. Dress in layers.
