Temporary heating is now up and running in the University Houses buildings, which has been a big asset given the recent sub-freezing temperatures that we are experiencing. The exterior stairway has been completed near building 21 as seen in the bottom right corner. Wall framing in Zone 1 helps give an idea of how the new space is taking shape.

The Past Two Weeks
- Wall framing in Zone 1
- Gypcrete poured in Zones 1 and 2
- Repair bathroom door frames in Zone 4 and 5
- Convecto rough in Zone 1
- Tubs delivered for Zone 4 and 5

Coming Up in the Weeks Ahead
- Pipe PVC stacks in Zones 3 and 4
- Set tubs in Zone 3
- Wall framing Zone 2
- Demo pipe in Zones 3 and 4

Did you know? Snow is actually clear and colorless. The complex structure of snow crystals results in countless tiny surfaces from which visible light is efficiently reflected. What little sunlight is absorbed by the snow is absorbed uniformly over the wavelengths of visible light, thus giving snow its white appearance.
