

MERIT LOFTING GUIDE

Assembly

- Mallet may be required for assembly, check with hall desk for tools
- If lofting bed, safety rail should be used
- If lofting near a window, the safety bar must be placed next to the window

Safety

- Two or more people are required to lift and stack furniture
- Lift with your legs/arms, not with your back
- Remove the mattress before lofting

Guidelines

- Avoid using tape as it will leave permanent marks
- All furniture must remain in the room; no storage is available and furniture cannot be removed from the building
- Furniture must be returned to its original “down” position at the end of your contract or you’ll incur a \$50 charge/bed (*bed frames in the third and fourth positions from the bottom of the uprights*)
- See Building Supervisors or House Fellows with questions or if you need more pins

Beds can be raised to their maximum height, allowing bookcases to be placed underneath.

The height of each bed can still be adjusted when stacking them on top of each other.

Different bed heights can be chosen by moving the bed frame up or down on the uprights.

Attach stabilizer bars to the top position on the bottom uprights and push the lever to lock it.
