Living on campus is a once-in-a-lifetime part of the Badger experience, so make the most of it and return in 2015-16!

Fire Safety - A smoke detector is located in each student room and all common areas including halls. If the fire alarms go off, please proceed to the nearest exit in an orderly fashion.

Campus Safety & Security - A great benefit to living on campus is the comfort of knowing you are in a place where University Police Liaisons make frequent visits, both day and night.

Helpful Safety Tips:

- Our buildings are only as safe as you make them. Remember to not let strangers in, and to lock your door when leaving.
- If you are ever confronted by an individual with a weapon, give up your property immediately.
- Receive WiscAlerts to get notifications when there is an emergency situation on campus. Sign up at:
  http://uw.wisc.edu/wiscalerts

By practicing thoughtful recycling habits, you become an important part of a culture of sustainability in your new home at UW-Madison. As we share our space in the residence halls and the Madison community, we also share our space and resources with billions of people around the world. The recycling decisions that you make each day will help us save landfill space and preserve our resources for future generations to use.

ResNet Internet Service is available in all rooms and residence hall common areas, including floor dens and main lounges. In addition, expanded basic cable TV service is available in each residence hall room along with a variety of foreign language channels & several high-definition channels. In order to connect to your rooms cable TV, you will need a coaxial video cable. A complete channel listing (over 250 channels) can be found at http://cable.doit.wisc.edu/rtnlineup.

Helpful Tips

1. Help conserve energy through common sense habits.
2. Close your drapes or blinds at night.
3. Open your drapes or blinds on sunny days during winter months.
4. Don’t leave the windows open.
5. Dress in layers.

If you come across a broken window, lock, or another urgent room situation such as a malfunctioning elevator, it is important to contact your house fellow or hall desk immediately. Non-emergency repairs such as burnt out light bulbs, window screens that need to be replaced, furniture that needs to be fixed (that is otherwise not causing a hazard), or problems with insects in rooms, are requested through an online system by submitting a MARS request. Go to mars.housing.wisc.edu to submit a request. It is important to note that you do not submit MARS request for problems with ResNet.

At University Housing, energy conservation is a priority. A thermostat is located on the wall near your room entrance. The temperature setting on the dial determines the temperature of the room. When leaving your room for the day, please lower the temperature setting (during heating season) and close windows in order to help conserve energy. It is important to keep your windows closed during unnecessarily cool or warm periods to conserve energy and maintain comfort for yourself and other residents.

Always check to make sure belongings (furniture, bedding, carpet) are not pushed up against the convector or radiator. A free flow of air must be maintained around the heating unit so air can pass through and heat your room. Please note: rooms may vary in size.

Adams Laundry Facility: Located in the HN Towers basement and the first floor of Fayville

Adams Hall:

Single Room Unlofted

Single Room Lofted

One option is to leave your bed in its original unlofted dorm position. The bed frame is reversible, giving you two different height options.

Assembly information

• No tools required.
• Pins MUST be used when lofting your bed. Extra pins are available from your Building Supervisor or House Fellow.
• Use long pins for beds and short pins for other pieces.
• The safety bar should NOT be removed. If the bar is not in the proper position for your setup, simply turn the bed over side-to-side or end-to-end to position it correctly.
• If you are lofting near a window, the safety rail must be next to the window.
• The bed frame can be flipped to give two different height options. When lofting, you can also rest the bed legs on or behind the stacking units to give additional height options.

Safety Requirements

• Two or more people are required to lift and stack furniture components. Keep your back straight and bend your knees. Lift with your legs and arms, not with your back.
• Remove the mattress before lofting a bed.

Other Instructions

• Avoid using tape on your furniture as it will leave a permanent mark.
• All furniture must remain in the room. There is no loft storage in the building and furniture cannot be removed from the building.
• At the end of the year, the furniture must be returned to the original down position or you will incur a $50 charge per bed.
• Please see your Building Supervisor or House Fellow if you have any questions.
